

Lahnpaper – unique · together

Quality and market leader in the international market for fibre products

LAHN PAPER is a medium-sized company, based in Koblenz, Germany, and part of the Kajo Neukirchen Group. We are a leading manufacturer of synthetic fibre papers, impregnated specialty substrates and nonwovens with an annual turnover of 42 million €. In selected market segments LAHN PAPER is the market leader with a special paper machine and flexible production possibilities. The company employs about 150 people.

INNOVATIVE & PRODUCTIVE

If you are looking for fibre products, synthetic substrates and nonwovens, then we are the company of first choice. To create true added value for our customers and partners we have developed a broad product portfolio. We have the relevant productive solutions, experts and expertise, along with cutting-edge technology and long years of experience - even for out-of-the-ordinary solutions and particularly for your specific, challenging requirements. We invest continuously and sustainably in the development of new products.

SPECIAL PAPERS AND NONWOVENS

Are you looking for a hard-wearing, waterproof or dimensionally stable material? Or an out-of-the-ordinary printing substrate for your advertising campaign? Or a unique substrate combining embedded security features with outstanding durability and robustness? Our products are primarily used in situations where stringent quality, stability and flexibility requirements need to be fulfilled. They are extremely versatile and offer solutions for a wide range of applications.
